# LABTEX

# THERMOMETERS FOR TESTING PETROLEUM PRODUCTS LABTEX®

TN-6M - thermometers for temperature measurement in a range from -30°C to +60°C. This type is used for indicating solidification and cloud temperatures of petroleum products.

TN-7M - thermometers for temperature measurement in a range from 0°C to +360°C.

This type is used for indicating temperatures in fractionation of petroleum products.

TN-8T - thermometers for temperature measurement in a range from -30°C to +60°C.

Thermometers are made from glass tube with including scale from milk glass.

TN-6m TN-7m

Type	Measurement range, °C		Graduation, °C	Accuracy of measurement, °C	Total		Thermometric liquid
	From	To			Length, mm	Diameter, mm	
TH-6m	-30	+60	1	±1	300±10	10±1	mercury
TH-7m	0	+360	1	±1	350±10	7,5±0,5	mercury
TH-8t	-80	+60	1	±1	350±10	11±1	toluene

## ELECTRIC-CONTACT THERMOMETERS TPKp® LABTEX®

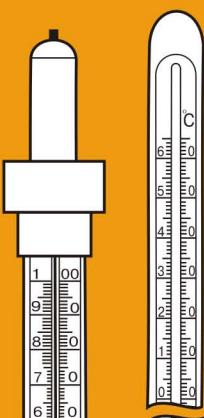

This type of thermometers makes it possible to visual control the temperature conditions in installations. The electric-contact thermometers are with a movable contact in which the working point varies over the range of temperature intervals with the help of magnetic device.

The measurement range is from -30°C to 300°C.

The thermometric liquid is mercury.

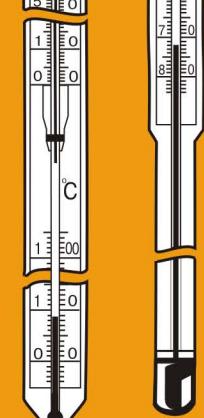

The length of upper part, mm: 355±10.

The diameter of upper part, mm: 18±1. The diameter of lower part, mm: 9±1.

## ASTM THERMOMETERS

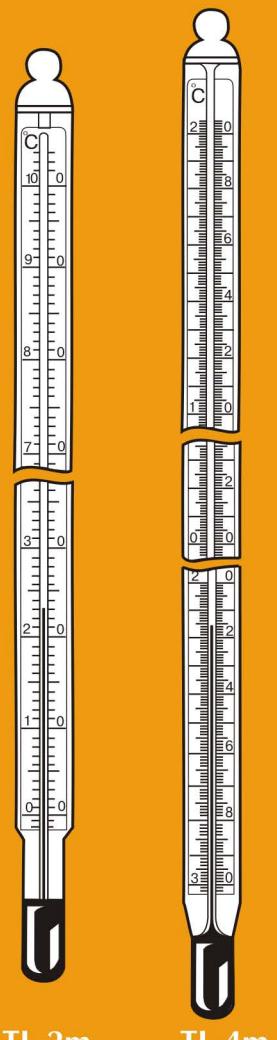

ASTM thermometers are applied to definition of temperature of turbidity and hardening temperature of fractional structure and flash, density, kinematic viscosity of mineral oil, fuel and oils. This type of thermometers is glass solid-stem thermometers, manufactured to latest standart E1, white backed, mercury filled (ASTM 6C, 114C: toluene filled; ASTM 43C, 73C, 74C, 99C, 122C: mercury-thallium filled).

We would like to take this opportunity to present you with our new Catalog of thermometres. This is the complete catalog of most used types of laboratory and industrial thermometers from LABTEX® series. To meet the needs of customers the thermometric liquids are of two kinds: mercury and organic liquids. All types of thermometers are made from special thermometer glass and graduated in degree Celsius( °C).

## LABORATORY THERMOMETERS TL-4M, TL-2M LABTEX®

The laboratory glass thermometers LABTEX® are intended for higher precision temperature measurement of liquids in a range from - 30°C to 360°C.

These types of thermometers are used for various areas of the industry, the enterprise of public health services, educational establishments.

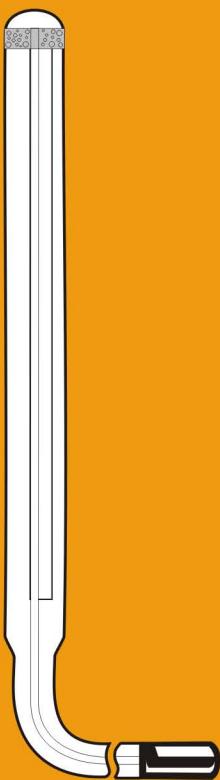

Thermometers are made from glass tube with including scale from milk glass.

The thermometric liquid is mercury.

Type	Measurement range, °C		Graduation, °C	Accuracy of mesurement, °C	Total	
	From	To			Length, mm	Diameter, mm
TL-2m	-30	+70	1	±1	250	7-9
	0	+100	1	±1	250	7-9
	0	+150	1	±1	320	7-9
	0	+250	1	0...200 ±1 200...250 ±2	360	7-9
	0	+360	1	0...200 ±1 200...360 ±2	400	7-9

	+190	+260	0,1	±0,5	530	11-12
	+240	+310	0,1	±0,5	530	11-12
	+290	+360	0,1	±1	530	11-12

CP-2P

## SPECIAL GLASS THERMOMETERS SP-2Ps LABTEX®

The special glass thermometers LABTEX® are intended for temperature measurement of liquids in a range from 0°C to 200°C.

These types of thermometers are used for various areas of the industry, the enterprise of public health services, educational establishments, the food-processing industry.

Thermometers are made from glass tube with including scale from milk glass.

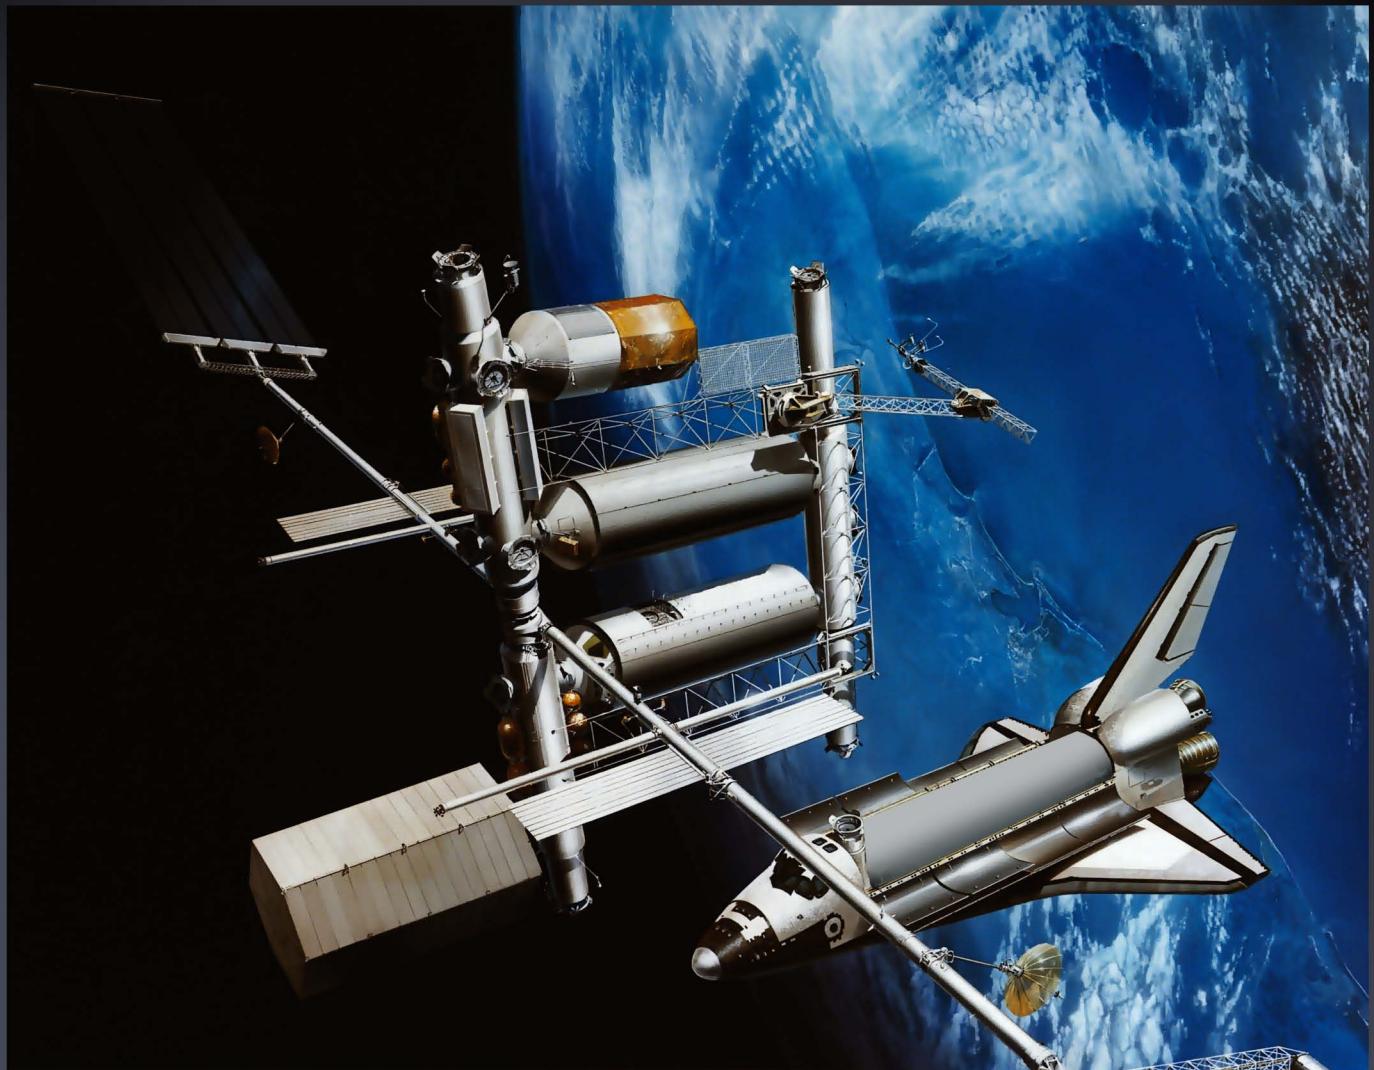

The thermometric liquid is red special liquid.

The leng of upper part, mm: 220±10.

The diameter of upper part, mm: 18±1. The diameter of lower part, mm: 9±1.

Type	Measurement range, °C		Graduation, °C	Accuracy of mesurement, °C	Length of lower parrt, straight(angle) mm
	From	To			
CP-2P	0	+50	1	± 1	60(110)
	0	+50	1	± 1	100(150)
	0	+50	1	± 1	160(210)
	0	+100	1	± 1	60(110)
	0	+100	1	± 1	100(150)
	0	+100	1	± 1	160(210)
	0	+150	2	± 2	60(110)
	0	+150	2	± 2	100(150)
	0	+150	2	± 2	160(210)
	0	+200	2	± 2	60(110)
	0	+200	2	± 2	100(150)
	0	+200	2	± 2	160(210)
